

Request the FCC reject the National Association of Broadcasters (NAB) attempt to stifle competition and stop XM satellite radio from offering traffic and weather information and other valuable services to listeners like myself. NAB is trying to limit XM's first amendment rights! I pay a monthly subscription fee to listen to high quality music and entertainment without the over abundance of commercials. It is unfortunate that the NAB is more interested in profit and controlling the airwaves than it is in getting vital information to the general public.
